

TRADESKIPS

IS AN 8 YARD SKIP ALWAYS THE BEST OPTION?

The 8 yard is by far the most popular skip size used in the UK. But is an 8 yard skip always the best solution when it comes to removing your waste?

The majority of the cost of a skip is related to the transport, so if you are using multiple skips on your site it's usually much more cost effective to have larger skips with less movements.

LESS MOVEMENTS = LESS COST.
